

## Subject List

### IFHE Digest 2023

Following a year where Healthcare has been stretched to the limit it would be of interest to all our readers to know how the Estates and Facility services in hospitals and the wider healthcare community have risen to the challenge. We would like to see articles related to the following:

**Covid.** How Healthcare organisations have coped post Covid

#### Other areas of interest include:

<b>Acoustics</b>	Noise reduction in healthcare settings
<b>Artificial Intelligence</b>	How is AI making advances in Healthcare?
<b>Asset Management</b>	
<b>Authorised Engineers</b>	Experience of providing appropriately trained individuals to ensure Medical Gas, Ventilation, Decontamination and Water Systems comply with regulations and are operated correctly,
<b>Building Management Systems</b>	
<b>Carbon Zero</b>	Strategies being adopted by healthcare to help reduce Carbon to zero
<b>Construction</b>	Offsite modular construction
<b>Care for the elderly</b>	How modern technology and design can assist the elderly and particularly those with dementia still live at home.
<b>Green Energy</b>	The use of alternative sources of energy such as Solar, Wind and Heat pumps
<b>Information Technology</b>	How is IT helping the Estates function control its plant and equipment?
<b>Lighting</b>	Advances in the use of LED lighting with particular emphasis on colour rendering
<b>Nurse Call</b>	Advances in nurse call services to the patient
<b>Training</b>	Bringing the next generation of maintenance staff and managers into an ever changing Healthcare environment.

**Plus any other items authors feel will be of interest to the worldwide Healthcare community**
